DETAILED ACTION

1. Receipt is acknowledged of the Amendment filed 13 July 2005. Claims 1-95 and 105-109 have been canceled and no claims have been newly added. Currently, claims 96-104 are remain pending in the application.

Allowable Subject Matter

2. Claims 96-104 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Blanford discloses a system having a primary label having a single layer and a first machine-readable bar code and a supplemental label attached the product or container. The supplemental label having a second machine readable bar code with a specific alignment with respect to the first bar code (i.e., the supplemental label is attached in close proximity to the primary label and the first bar code and the second bar code are substantially aligned side-by-side, such that the second bar code is positioned as to partially obscure the first bar code). Wherein the first bar code label provides information about a particular product (i.e., product identity) and the second bar code label identifies the particular product information desired to be distributed to a consumer, e.g., an indication that the identified product has been marked down. The system includes a scanner capable of reading both the first and the second bar code and subsequently comparing the second bar code with the first to determine if the second bar code corresponds to the first bar code. Further, the supplemental label of Blanford having many portions (i.e., an upper portion having an upper left portion and an upper right portion, a lower portion having a lower left portion and a lower right portion, a left portion, a right portion, and a center portion, and etc.). Thus, one of the above portions from the supplemental label of Blanford is aligned with the first bar code on the primary label.

One of ordinary skill in the art would not have been motivated to modify the teachings of Blanford, alone or in combination with other references, in order to provide a pharmaceutical container having a symbol with specifics claimed single-layered label having first outer boundary portion and second outer boundary portion extending out and away from the outer boundary of the first portion and wherein the second portion having a patient identifying indicium aligned with the symbol of the container so as to allow both the symbol and the indicium to be scanned together by a detector in order to confirm the contents of the pharmaceutical container, as set forth in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
